## Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

## **ICPSR PROCESSING NOTE FOR # 34363**

*Social Justice Sexuality Project: 2010 National Survey, including Puerto Rico*

### ***Public Use Data***

#### **1) Confidentiality:**

- In the public use data, ICPSR has blanked all variables with open ended responses and indirect identifiers (such as age, income, geographic location, zip code) to preserve respondent anonymity.
- More specifically, variables **Q15D**, **Q21B1**, **Q23B2**, were recoded into quartiles.
- For access to the restricted use data, the user must sign the ICPSR Restricted Data Use Agreement.

#### **2) Question Text:**

- Question text was added to the data based on the original data collection instrument deposited by the Principal Investigator.

#### **3) Value Labels:**

- Value labels were standardized based on the original data collection instrument deposited by the Principal Investigator.
- Any spelling errors found in the value labels were corrected during ICPSR processing.

#### **4) Missing Values:**

- Missing values were standardized as per the study's convention. Values of "8" or "9" were recoded or labeled as "Missing Data".

#### **5) Unknown Code:**

- Any unknown codes were given the value label "Unknown Code ( ICPSR ADDED)".

#### **6) Special Considerations:**

- Formatted several variables in order to display appropriate text length.
- For string variables, blank responses were recoded as "BLANK".

### **Variable Description and Frequencies**

**Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.**

**Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.**

## **SOCIAL JUSTICE SEXUALITY (SJS) PROJECT**

**The Social Justice Sexuality (SJS) Project** is one of the largest national surveys of Black, Latina/o, and Asian and Pacific Islander, and multiracial lesbian, gay, bisexual, and transgender (LGBT) people. With over 5,000 respondents, the final sample includes respondents from all 50 states; Washington, DC, and Puerto Rico; in rural and suburban areas, in addition to large urban areas; and from a variety of ages, racial/ethnic identities, sexual orientations, and gender identities.

The purpose of the **Social Justice Sexuality (SJS) Project** is to document and celebrate the experiences of lesbian, gay, bisexual and transgender (LGBT) people of color.
